Re: Brief Description of Funders / Funding Positive Change Organization

Dear Paul,

Due to the fact that our business with you/your Company(s) is dependent upon PSC receiving its approved funding, we wanted to expand a bit more about what we do know about our Funders. We will try to expand on the details of our Funding Group, Funding Positive Change Organization as much as we can without breaking any of the terms of our NDA with them.

In the simplest explanation, the Funders are many in number. They all have a great deal of wealth already, and have made investments and/or purchased currency from other countries all around the world. Now with the New Republic being established and the RV/GCR (Revaluation of currencies / Global Currency Reset) being set around the world, those currencies that were purchased prior for very low are now being redeemed for a much higher price. In essence, turning Millions into Trillions or more...

Additionally, many of those big Investors have decided to come together and have agreed to fund a vast array of Humanitarian Projects, (both Non-Profit and For-Profit Projects) so once the currency has been exchanged or paid out, then those monies will be used to fund our Projects as well as all the other Humanitarian Projects. (By taking on Humanitarian Projects the Investors also are given a higher rate of return for their currency exchanges.)

The Process for us qualifying for this funding was arduous, but well worth the wait. In fact, there were about three stages that we had to pass through before fully being

accepted. Our large For-Profit Project alone has been given four money managers that helped us with all the excel spreadsheets and project planning details.

Moreover, from the details stated within our weekly updates, we have come to understand that these funders have a large team of administrators and money managers. Those administrators have arranged and prioritized all the Humanitarian Projects into a number of Tiers, Groups and Sub-Groups, (Tier-1, Tier 2, & Tier -3) selecting the Projects that are most essential for our planet and our Eco System to go first. (We are in what is called, "The Church Group," which is a Sub-Group within Tier-3.)

The Admiral and Admiral Sub-Group were stated as the groups to be paid out first, since all their Projects in this group had technology or projects specifically focused on our earth's eco system, i.e. Japan's nuclear waste spill, natural disaster clean up projects, global warming reduction projects, etc. And from last reported in December 2016, all Tiers have now been paid out or are in route to receive their funds.

Our specific Funders are in Tier-3, which is now being finalized and their currencies have or are being exchanged right now, so that only now leaves their Sub-Group to be paid out next, which again is our Project. And as affirmed in our last Update dated Tuesday, January 17th, 2017 we were told by our contact person that we/our Group are next in line for payout, so we are now on "stand-by" status for our Blackout period.

(Blackout as you may remember, is the time period where all contracts are signed, bank accounts are set up for us and where all details of audits and managing of the funds comes into play and full understanding. It has been said that the Blackout process could take between 30 to 45 days.)

So that's pretty much the basic overview of our funding source. Lastly, as you already know, Paul, we now are receiving weekly Updates on our Funding, and as usual, we will continue to keep you updated on our progress with our funding as we move ahead.
